***DETAILED ACTION***

***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 5/4/2009 has been entered, and claims 3 and 13-14 are currently pending, claims 13 and 14 being newly added.

***Claim Rejections - 35 USC § 103***

The following is a quotation of the relevant portion of 35 U.S.C. 103 that forms the basis for the rejections made in this section of the office action;

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains.

**Claims 3 and 13-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Toshiya et al. (Japanese pub# 2001-273375) in combination with 'Exam Results', - a press release from Dublin City University.**

**Regarding claims 3 and 13-14,** Toshiya discloses a system for distributing exam results which sends a user an email asking if the user wants to view exam results, and upon a user reply, sends another email to the user containing a link (network address) containing the results. See paragraphs 0001 and 0018-

0020. Toshiya also discloses in paragraph 0021 that examinees are identified by examinee numbers. Although Toshiya discloses wherein the results can include the results of other examinees willing to share, (see paragraph 0026), there is no teaching wherein it is ID numbers in close proximity with corresponding results that is transmitted to the examinee (in order to provide a sample of test results to lessen the psychological impact of the examinees score). However, posting and releasing exam information including information about other examinees has been common for many years (e.g. results of exams were typically posted on boards wherein the scores were ranked and identified by Social Security number, student ID number, etc.). Consider the enclosed reference, which is a press release from Dublin City University from June of 2001, which indicates that it was in fact common for exam results to be printed and hand-posted on campus, utilizing student numbers as identifiers. Note that information about multiple examinees would be presented on the list, since the list would pertain to an entire group. It would have been obvious to one of ordinary skill in the art at the time of the invention to include such information about multiple examinees in other systems as well, including Toshiya, in order to allow the examinee to see how they performed in a comparative sense with fellow examinees, as is already well established in the art.

### ***Response to Arguments***
